Linda Ketellapper, SFD-7-5  
U.S. Environmental Protection Agency  
Superfund Division  
75 Hawthorne Street  
San Francisco, CA 94105

Dear Ms. Ketellapper:

Re: General Notice Letter and Request for Information  
Omega Chemical Corporation Site

Under CERCLA Section 104(e), USEPA requested that Chrysler provide a written response "reporting the status of all . . . activities and obligations" related to property located at 12128 Burke Street in Santa Fe Springs, California (a portion of which formerly had the address 12140 Slauson Avenue). The information request was made within the General Notice Letter and Request for Information Omega Chemical Corporation Site, dated February 24, 2009 and received by Chrysler on February 26<sup>th</sup>. An extension to the 30-day response time was granted that provides a response due date of April 27, 2009.

Chrysler reviewed documents it holds related to both Burke and Slauson addresses. From that review, it appears that Chrysler leased property from the Southern Pacific Company from the mid-1960's through the mid 1980's for use as a new car preparation facility. There are no ongoing activities or obligations at the property that Chrysler is involved with. Further, there are no agreements or orders related to the property between Chrysler and any other party that Chrysler is aware of.

Sincerely,  
Chrysler LLC
